EDUCATION

- **Graphic Era Hill University, Dehradun** 2019 – 2023
B.Tech in Computer Science & Engineering CGPA: 8.3/10
- **SJS Public School, Raebareli** 2017 – 2018
CBSE XII Percentage: 78.2%

EXPERIENCE

- **Thoughtworks** April 2025 – Present
Consultant Developer – GenAI Gurgaon (Hybrid)
 - Architected and deployed the **Customer Issue AI Agent** using **Chainlit, Qwen2-14B, Python, and LangChain** with **tool calling, function chaining, and prompt tuning**, empowering 1000+ bank users to diagnose payment failures, query customer logs, and resolve Kubernetes/database issues via natural language – integrated with **Jaeger and Grafana** for end-to-end observability.
 - Designed the **Semantic Debugging AI Agent** – a unified conversational platform with application-level dropdown and **multi-tool orchestration** across 5+ integration types (**Logs, Grafana, Prometheus, Confluence, ELK**), enabling teams to debug production issues in plain English; actively scaling across multiple engineering teams.
 - Optimized LLM inference latency by 50% through **token pruning, context window management, and response caching**; reduced token consumption by 30% via **dynamic prompt compression** and few-shot optimization, cutting API costs significantly.
 - Built **multi-agent workflows** using **CrewAI and LangGraph** for autonomous task delegation across agents (log analyzer, root-cause identifier, resolution recommender), reducing manual triage effort by 70%.
 - Pioneered **AI-driven DevOps workflows** by bridging observability tooling (ELK, Prometheus) with **agentic LLM tool calls**, creating self-service debugging capabilities – reducing L2 escalations by 60%+ for recurring issues.
 - Stepped up as **acting Senior Consultant** after lead's departure, single-handedly managing 3 AI agent applications while directly engaging **CTO and stakeholders** for requirement gathering, sprint planning, and Jira-based agile delivery.
- **Incture Technology** Jan 2023 – March 2025
Associate Software Engineer Chandigarh
 - Designed scalable backend systems and **RESTful APIs** using **Java and Spring Boot**, improving system performance by 40% and reducing query execution time by 35% across MySQL, MongoDB, and Elasticsearch.
 - Built **microservices architecture** with Kafka, Docker, and Kubernetes, increasing scalability by 45% and deployment efficiency by 50%.
 - Implemented secure authentication using **OAuth2, JWT, and RBAC**, reducing security vulnerabilities by 50% through rigorous testing and code reviews.

PERSONAL PROJECTS

- **AI-Powered Custom Clothing API**
Java, Spring Boot, MySQL, TensorFlow, Stripe API
 - Built a scalable backend leveraging **TensorFlow** for AI-driven personalized clothing recommendations across 10,000+ user profiles, improving accuracy by 30%; integrated **Stripe API** for secure payments with 100% success rate.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C++, Node.js
GenAI / ML: LangChain, CrewAI, LangGraph, Chainlit, LLMs (Qwen2, GPT, Gemini), RAG, Tool Calling, Prompt Tuning, TensorFlow, ML, NLP
Databases: MySQL, PostgreSQL, MongoDB, Elasticsearch, SAP HANA
Cloud / DevOps: AWS (S3, EC2, Lambda), Docker, Kubernetes, CI/CD, ELK Stack, Grafana, Prometheus, Jaeger
Core: AI Agent Architecture, Microservices, Kafka, System Design, RESTful APIs, Agile/Jira, Stakeholder Management

HONOURS AND AWARDS

- **Published NPM Package** – Created open-source package `zip_csv_to_json`, live with 10+ downloads/week on npm.
- **AWS Cloud Practitioner** – Proficient in AWS core services, cloud security, architecture, and cost management.
